## SECURITY AWARENESS AS A SERVICE

Our **security awareness campaign** consisting of active trainings paired with simulated phishing attacks will make your employees an active member of your defense strategy. In coordination with your IT security officer we take over the campaign planning, implementation and reporting as a complete service.

- Planning security awareness campaign (period, target group, locations, languages...)
- Conception of the training content
- Planning of the phishing simulations
- Coordination of internal communication
- Initial employee assessment for the formation of content-related training groups
- Selection and roll-out of trainings and phishing simulations to defined training groups over the entire campaign period
- Reporting based on the defined KPIs
- Management summary for transparent presentation of campaign results

## GOALS OF A SECURITY AWARENESS CAMPAIGN

- Transform employees from security risks to active members of defense.
- Awaken employee motivation for the security awareness campaign.
- Need-based training and phishing simulations.
- Incorporate acute threat situation from dark web monitoring into content.
- KPI-based analysis of employee behavior
- Cost and resource saving approach (low TCO)

## INDIVIDUAL SOCIAL ENGINEERING

If you would like to test further social engineering attack vectors in your company, we also offer support in this area. We simulate a variety of attacks such as:

- Customized social engineering attacks
- Personalized spear phishing attacks
- USB attack with Rubber Duckys
- Pretexting attacks
- Vhishing attacks (automated and personal)  
Actions to test if employees/call center/helpdesk hand out information: CEO Fraud Tailgating
- Manipulated websites
- Onsite implants
- Hotplug attacks
- WIFI pentests
